Education

Maharana Pratap Engineering College

Bachelor of Technology in Computer Science and Engineering

Sep. 2021 – May 2025

Kanpur, Uttar Pradesh

J.R.Convent

CBSE - Class XII

July 2021

Siwan, Bihar

J.R.Convent

CBSE - Class X

May 2019

Siwan, Bihar

Work Experience

Cognizant

Programmer Analyst Trainee

July 2025 – till now

- Worked on the **Health Insurance Claim Management System**, focusing on user authentication and authorization module.
- Gained exposure to Agile methodology, Spring Boot, and cloud basics during project development.

Projects

AI Workhub | React 19, Spring Boot 3, Java 21, MySQL, Redis, Docker, LLM (OpenAI/Groq)

Jul 2026 – Present

- Currently developing a full-stack, multi-tenant project-management platform with role-based organizations (invite-code join + admin approval), Kanban boards, tasks, teams, and dashboards, following SDLC practices and structured debugging.
- Building an agentic AI assistant to convert natural-language prompts into structured actions executed on live data, integrated via an OpenAI-compatible LLM (OpenAI/Groq) with a heuristic fallback.
- Implementing a layered backend (controller/service/repository) secured by a stateless JWT filter chain with BCrypt, role-based access control, and per-organization tenant isolation, with Redis-backed email-OTP signup, login lockout, and logout revocation.
- Integrating a React frontend with the Java Spring Boot backend and containerizing the stack with Docker; deployment and remaining features are ongoing.

Health Insurance Claim Management System – Authentication Module | Spring Boot, MySQL, MVC

Oct 2025

- Developed and integrated the **user authentication and authorization module** to secure claim data access.
- Applied secure password hashing using bcrypt and enforced session management best practices.
- Collaborated with team to align authentication workflows with overall system architecture and compliance standards.

Technical Skills

Languages: Java, Python, HTML/CSS, JavaScript, SQL, PL/SQL

Developer Tools: VS Code, Eclipse, JIRA, Postman, Docker

Technologies/Frameworks: ReactJS, NodeJS, Spring Boot, Spring Security, Spring Data JPA, Bootstrap, Tailwind CSS, REST APIs

Testing Frameworks: JUnit, Mockito

Version Control: Git/GitHub

Database: MySQL, Redis

Cloud/DevOps: Docker, CI/CD (GitHub Actions), Deployment (Render/Aiven), Cloud Storage & Authentication basics

Methodologies: Agile (Scrum), SDLC

Competitive Programming & Achievements

- Ranked #41 in Naukri Campus Young Turks Coding Challenge (2024-2025)
- Winner, MPGI TECH-A-THON (2022-2023)

Leadership & Involvement

- **Coordinator, Technical Fest**

Managed volunteer training and task allocation for a technical fest, ensuring 10 volunteers were well-prepared and informed; promoted team coordination and effective communication.
